Description

The 4LAN SFP 1G BiDi is a single mode SFP transceivers series for optical data communications such as 1000BASE-BX defined by IEEE 802.3z.

This modules are designed to operate with single mode fiber (SMF) and LC connectors using only one fiber at the wavelength 1310nm, 1490nm or 1550nm for Tx and Rx (the wavelengths alternate on each side depending on the model) for distances up to 150km.
